

ZPARTNER – YOUR PARTNER ON THE WAY TO EFFICIENT ANALYTICS

After SAP BW BEx Frontend Tools, Sap Lumira and Webi being around for a while, SAP's latest introduction is a new frontend to support SAP BW as well as other tools.

Does that new cloud-based tool fit your needs when consuming SAP BW data?

Is SAP Analytics Cloud (SAC) ready for you?

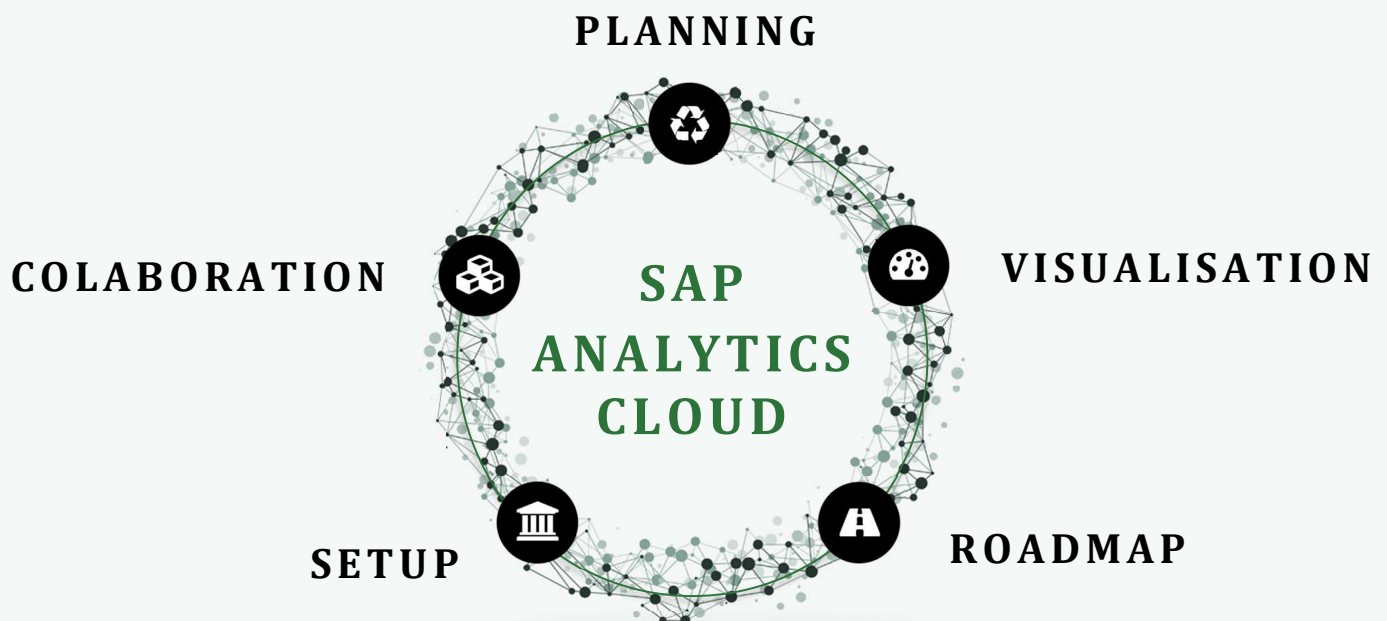

Let's explore if the frontend fits to your needs

OUR OFFER

Before investing in SAP Analytics Cloud, take a first look at the solution with ZPARTNER.

In 2 hours workshop you will experience how the frontend works in practice and enjoy a live demo including analytics, planning and collaboration.

The outcome: You know how you can get started with SAP Analytics Cloud and what the next steps should be.

See SAC for yourself in a live demo with three different dashboards typically used by departments in your organization.
Discover how SAP Analytics Cloud Planning fits your needs and find out whether it is worth the investment.

We support you all the way to the right analytical frontend.
